Outlook Compatibility

Why E-mail Sorting Solutions?

Why ST BERNARD?

Why?

Focused on Managed Messaging Security Since 2003

Superior-Architected Infrastructure

DATACENTERS:

Carrier-class hosting facilities with power and back-up power supplies, Generator, temperature, humidity control and fire suppression systems

12 hours of battery life and 24 hours of generator fuel with contracts for 4 hour diesel fuel delivery

Onsite technician

SERVER FARM

Dedicated Server Clusters for Web, IM, E-mail, Archiving and filtering services with Backend SQL databases

Server Clusters for Messaging Services are an adaptable server or client based provisioning.

Messaging System is based on Cisco, Linux, Unix, Dell and EMC hardware.

Load-Balancers distribute connections across hardware and allow for easy addition of new hardware and auto-detection/removal of down equipment without interruption.

System is monitored and automatic alerts sent out when failures or heavy loads are detected. Stats stored for future growth projections.

Dual redundant/load-balanced fiber optic IP internet connections to Tier 1 internet back-bone providers.

SUPPORTED BY CERTIFIED ENGINEERS

Linux, MCSE, CCNA, CCNP, CCDA certified engineers maintain our infrastructure and provision our equipment and software as a service.

Why?

Since 1995 Focused on Internet Security Software

Own Well-Architected Hardened Technology

- Enterprise proven Messaging security platforms
- Promptly adapts to new threats or regulations
- Flexible to incorporate specific customer requirements
- Mature Technology
- Industry-acclaimed
- **> 12 years, >multiple countries >5,0000 clients**
- **Millions of protected machines**
- **Multiple awards for performance and value**

Established in 1995, deployed across millions of computers worldwide, the company's award-winning products deliver innovative security solutions that offer the best combination of ease-of-use, performance and value.

ST. BERNARD's delivers Internet filtering technology that enforces acceptable use policies and delivers perimeter protection from Internet-based threats in HTTP, IM and P2P traffic including spyware, malware and phishing.

Together... Focused on Complete Message Security

How does Total Message Care work?

By routing all messaging traffic through our IM, email, & web server clusters, all internet communication can be scanned and filtered for threats.

Add these important facts;

- the email is hosted, can be POP3, IMAP, or MAPI
- collaboration is enabled for calendar and task sharing
- Remote devices synchronize and update calendars
- the flexibility to not provision individual security filters allows for supporting combinations with legacy systems.
- Redundancy and Disaster Recovery are included as archived communications are stored at our data centers.

Total Message Care is a bundled offering for email, calendar, data archival, Spam Filtering & Antivirus, as well as Web Content and IM Filtering services all in one.

Provisioning:

1. **Create User Accounts**
-email, IM, and Web users
2. **Configure Protocols**
-Collaboration, Email, IM, and Web
3. **Redirect Message Traffic**
4. **Secure Message Traffic**
5. **Configure Groups, Preferences**

Why?

Focused on our Customers Messaging Security

Over the years, we've answered the requests of our end user focus groups and our clients by **PROVIDING**:

- No risk, guaranteed service, cancelable at will.
- No set up fees, maintenance fees or upgrade fees.
- No hardware or software purchases or licenses needed, no changes to legacy systems.
- No-long term contracts, just month to month actual billing.
- Co-Branding**– Create confidence with your **own brand name** premium filtering services, instill assurances backing **your** service with the St. Bernard's name.
- Virtual ownership of our World-class infrastructure, use our redundant data centers to guarantee uptime, speed, and ironclad reliability to process huge volumes of filtering requests in milliseconds.
- Volume license sharing in the World-renowned, award winning filtering technologies
- Real time monthly billing safeguarding against turnover, with accurate user verification, meaning fair and exact billing for only the accounts benefiting from the filtering service. As the number of filtered users fluctuates, so do the amounts charged,
- Web based management center for Administrators and for the end user.
- Free 30-day trial period, for up to 5 users.

Email Details by the Minute

Delivering a best of breed messaging security technology is only half the battle, enabling managers and administrators to account for employee time and productivity with global and granular reporting are essential to fair AUP (Acceptable Use Policy) enforcement.

Blocking file types from being IM shared, blocking viruses from being peer shared, and blocking defined intellectual property content from email are expectations, having the tools to live monitor and manage usages brings Total Message Care technologies into the highest security levels.

Why?

Focused on Value & Control

ADMINISTRATION TOOLS

- Web based User Management Console for Administrators
- Create custom Objectionable Words List (OBL)
- Blocked messages, Policy violations can be reported via email to Administrators, managers, and supervisors.
